July 2nd, 2024

Public Works Utilities Committee/ Board of Trustees

On July 2nd, 2024 at 10:00 am, a bid opening was held for the construction of a pole building at the DPW Facility. The bid spec included details on construction materials, and requested optional bid items to cover and issues with the site construction prep should there be any soil issues that are encountered.

The bid broke out the building package and materials, the concrete floors, as well as the option to build the structure on a grade beam footing if required due to soil issues.

One bid was received at the bid opening in the amount of \$178,170 for all options. The bidder was Walter's Buildings (Allenton, WI) who have been in the business with great references since 1967. Within the past 5 years they have completed similar buildings for the City of Amery, Ashippun Fire Department, Waukesha Parks, Rec and Forestry, and many other businesses and private structures. The DPW will have the option of performing some minor site work that may provide additional discounts that would help with the overall cost of the project.

This 2024 Capital Budget item was approved for \$181,000.00. I recommend approval of Walter's Building's bid for a total of \$178,170.00 to the Public Works Utilities Committee and the Board of Trustees.

Thank you,

Richard Paul, Jr.
