Tom,  
Please post the letter from Mr. Ferber and my reply.

Mr. Ferber,  
Thank you for your note expressing opinion regarding the proposed Reinders property project. Issues of density, elevation and safety will be evaluated if an application for a project is filed. At this point in time we do not have an application and neither the Village Board, Plan Commission or other Village body have voted regarding a possible development. If an application for development permits is filed it will receive a transparent, fair and complete review with numerous opportunities for input. I have always been very proud to serve on the Village Board and have only the highest respect for those I have served with. If you do not believe the Board is representing you well I suggest you run for office. Our Village has been well served by many thoughtful and dedicated volunteers who work to evaluate issues to protect the best interests of the Village. If you would like to have a cup of coffee and discuss these matters let me know.  
Thank you,  
Neil Palmer

Subject: Reinder's property

As a 30 year resident of Elm Grove,I find it hard to accept rental High Rise apartments here in our village, It will take away the feeling of being safe and open the door to high density and security issues. We do not need this and would rather see individual homes and condos.Please do not ruin this village for Mr Reinders benefit. Cannot believe our village trustees are for this.Maybe we have the wrong people representing us for the good of the village.

Andrew and Carole Ferber
